

PREVENTABLE

Pragmatic Evaluation of evENTs And Benefits of Lipid-lowering in older adults

PREVENTABLE Pre-screen Introduction and Interview

Site Staff Instructions: Before you begin the pre-screening interview, please provide each potential study participant with a brief introduction of the study, ensuring that the points discussed below are covered.

Hello, may I speak with [potential study participant's full name]?

RESPONDENT NOT AVAILABLE

IF ANSWERING MACHINE/VOICEMAIL: Hello, my name is [interviewer name] from the Emory School of Medicine. I am calling for [potential study participant's full name]. I wanted to reach out to you regarding PREVENTABLE, a nationwide project Emory is assisting with alongside Duke and Wake Forest Universities. This study is focused on people 75 and older, is the largest of its kind in the US, and wants to see if statins can be used in the prevention of dementia and related conditions. Your medical records indicate you may be a good fit for the project and I wanted to see if you'd like to learn more. If so, please call me, [restate interviewer name], at [770-330-7790]. You may also find additional information at preventabletrial.org. [Closing remark].

IF OTHER HOUSEHOLD MEMBER ANSWERS: My name is [interviewer name]. I'm calling from the Emory University School of Medicine. I'm reaching out regarding a research project [potential study participant's first name] may be a good candidate for. Can you suggest a good time when I could reach him/her?

RESPONDENT AVAILABLE

My name is [interviewer name] and I'm calling from the Emory School of Medicine. Your records indicate that you may be a good fit for a research study called PREVENTABLE, a nationwide project that Emory is participating in. PREVENTABLE is one of the largest studies in older adults and we are looking to partner with people 75 years or older. We want to learn if taking a statin could help prevent dementia in older adults. A statin is a commonly used drug to lower cholesterol.

Would you like to learn more about this study?

If No: Try to determine, and then document, whether the potential participant is:

- not interested at all; document reason for declining on page 4.
 - If the reason is related to taking medication, please offer the participant information on PRISEM. A sample script is contained below:

PRISEM SCRIPT

I respect your concerns regarding taking the study medication [restate reason, i.e. a spouse's bad experience with the medication]. I do want to mention that, if you are interested in dementia and cognition-related research, our primary investigator [Dr. Kulshreshtha] is operating a similar study that does not utilize medication. It is called PRISEM and focuses on lifestyle changes and wellness practices. If you might be interested in this research I can contact the project coordinator, Audrey Colletta, and have her contact you.

- If they accept, please confirm the participant's information and log it in the PRISEM referral document on the shared drive
- If they decline, proceed as indicated below
- *it's just that now is not a good time, and they might consider talking about the study in the future; may be re-contacted (if patient gives permission).*

Commented [RM1]: Please ignore the mention of PRISEM

If Yes:

- The benefits of taking statins for older adults without heart disease are not fully understood. A goal of the PREVENTABLE study is to learn if taking a statin is helpful for older adults like you.

This study is performed in partnership with your clinician. For most of the study, we can follow you over the phone. Here are some details of what to expect if you decide to participate.

You can enroll in the study, at home or in-person, where a member of the study team will tell you about the study and answer any questions you may have.

You will:

- Do a few memory and physical tests.
- If you enroll at home, then the physical performance test is optional, but highly recommended. We can arrange for you to come to the clinic for a short visit to do the physical test.
- Be randomized to take the study drug or the placebo. Randomly assigned means your group assignment will be determined by chance. You will have an equal chance of receiving the study drug or the placebo. The placebo is a pill that looks like the study drug but does not have the study drug in it. You will take one (1) pill a day.
- Have one (1) follow-up phone call a year. Each call should take about 45 - 60 minutes.
- You will not be charged for the study drug or any study-related procedures.
- You will be paid \$[75] to cover study-related costs, such as parking and for your time.
- All information collected during the study will be kept private.
- The study will last about five (5) years.

Do you have any questions?

Are you interested in completing a brief interview to learn if you would be a good fit for PREVENTABLE? This is to determine next steps. It does not determine if you are eligible for the study.

If yes, move on to the pre-screen interview

PREVENTABLE Prescreen Interview

Potential study participant's first and last name: [REDACTED]

Do you give verbal permission to answer pre-screening questions?

☐ Verbal permission obtained from potential study participant Date: [REDACTED]

Initials of staff member obtaining verbal permission: [REDACTED]

Inclusion Criteria	All Answers Must be Yes for the Participant to be Eligible
Are you living independently?	☐ Yes ☐ No
Are you 75 years old or older?	☐ Yes ☐ No
Exclusion Criteria	All Answers Must be No for the Participant to be Eligible
Have you had a heart attack or stroke?	☐ Yes ☐ No ☐ Don't know
Have you been hospitalized for heart failure in the last 12 months?	☐ Yes ☐ No ☐ Don't know
Have you been diagnosed with dementia?	☐ Yes ☐ No ☐ Don't know
Do you have a significant disability that limits your basic everyday activities (eating, bathing, getting dressed, and going to the bathroom)?	☐ Yes ☐ No
Are you severely hearing impaired?	☐ Yes ☐ No
Are you severely visually impaired?	☐ Yes ☐ No
Are you currently taking a statin?	☐ Yes ☐ No
If you have previously taken a statin, was it for longer than 5 years?	☐ Yes ☐ No ☐ Don't know
Do you know if you have had problems taking a statin called atorvastatin, also called Lipitor®?	☐ Yes ☐ No ☐ Don't know
Do you currently have liver disease?	☐ Yes ☐ No ☐ Don't know

Are answers to all inclusion criteria **Yes** and **No** or **Don't know** to all exclusion criteria? (Note, unsure responses can be followed-up at the study enrollment visit.)

☐ YES ☐ NO

- If Yes, the potential participant is a **pre-screen pass**.
- If No, the potential participant is a **pre-screen fail**.

Pre-screen Fail: I'm sorry, but based on the information you provided, the PREVENTABLE study will not be a good fit for you. Thank you for your interest and taking the time to answer my questions.

Pre-screen Pass : It sounds like you are eligible to participate in PREVENTABLE.

1) Do you have any questions about next steps or about the study?

[IF YES, address the person's questions]

2) Are you interested in participating in PREVENTABLE? ☐ YES ☐ NO

[IF YES, then go over the following:

- The study enrollment visit and procedures may take approximately two hours. Ask if the potential participant if he/she would like to 1) meet before their upcoming clinic appointment, 2) meet after their clinic appointment, 3) meet on a date/time that is not connected with an upcoming clinic appointment, 4) enroll in the study from home, right now or receive another call at a better date and time.

IN-PERSON ENROLLMENT

☐ Before visit ☐ After visit ☐ At a time not related to an upcoming visit

VIRTUAL ENROLLMENT

☐ At home, on a future date and time

- A coordinator will meet or call you to discuss the study with you, answer any questions you may have, ask you to sign the informed consent document, and perform study procedures on:

[] (date/time)

[] (location)

[IF **NO**, then document that the person passed the pre-screen questions but declined to move forward. Document the reason for declining].

- ☐ Don't want to be randomized
- ☐ Worry about risks
- ☐ My doctor does not approve
- ☐ My family does not approve
- ☐ Too busy
- ☐ No compensation or insufficient compensation for time/travel
- ☐ Unwilling to come to clinic for labs or physical tests
- ☐ Privacy concerns
- ☐ Don't trust medical research
- ☐ Other, please specify: _____
